NEWS_PDF_DATE: 2004/9/11 12:45:33

XOOPS Team is pleased to announce the release of XOOPS 2.0.7.3. It includes a fix for a security bug that allowed hijacking of session variables in a certain circumstance, even with 2.0.7.2. It is **strongly recommended** that all users using any of the previous versions of XOOPS including 2.0.7.2 upgrade to this latest version.

Changes

=====

!! SECURITY FIX !! fixed more bugs that allowed session hijacking under a certain circumstance (Onokazu)

For new users, there is a full package of 2.0.7.3 available for download both in [zip](#) and [tar.gz](#) formats.

For users currently running 2.0.7.1/2.0.7.2, extract [xoops-2.0.7.x_to_2.0.7.3.zip](#) or [xoops-2.0.7.x_to_2.0.7.3.tgz](#) and just overwrite the old files with the new ones.

For users currently running 2.0.7, extract [xoops-2.0.7_to_2.0.7.3.zip](#) or [xoops-2.0.7_to_2.0.7.3.tgz](#) and just overwrite the old files with the new ones.
