Some month ago I learned about Xoops, installed it and today I proudly present [my site](#). I made this site for the local boy(&girl)-scouts, it offers on-line access for our members to our agenda, events, reports, announcements...

Xoops was just the answer for my problem updating our former static site 😞 . Now every member (with the proper permissions) can contribute to the site without webmaster interference

Thank you Xoops and keep up the work guys! 😊

I allready made a member administration module myself but still have to work on it untill release for the public.
