Javascript Backend - Modules

NEWS_PDF_AUTHOR: lykoszine

NEWS_PDF_DATE: 2002/3/10 10:48:02

Bit of over glorification to call this a module, more like a hack, but there is no Hack Category as such.

This is a simple hack to provide a a way for sites without the capabilty to parse rss to incorporate your newsfeed into their site. All they need to do is add a line of javascript into the page on which they wish to display the content.

Get the two files from:
backendjs

All feedback welcome, as this is the first time I have coded anything at all in php...

I will probably also hack the backend.php to include a similar cache, so as not to drain the db.
