Hi, One day we are looking to move our football memorabilia site <http://www.football4sale.com> to Xoops. So while we are getting used to Xoops and all things it offers we have been setting up some quick sites. Trying to use a lot of the features & mods available.

<http://www.talk4sale.com> and it pulls in mobile phone advice and looks for best offers available on the Internet.

<http://www.domain-name4sale.com> is the same type but for domain and web site stuff.

Xoops hasn't disappointed us yet !

Dave.
