I have updated the xCredits 1.0 Module.
This was only to fix the bug of not being able to "ADD" New Groups to your list.

You can download the updated version at
http://moh.xoaclan.com in the downloads sections

OR

edit the file credits/admin/index.php
find the six (6) spelling mistakes of
"credits_type"

and change it to

"credit_types"

Just remember there is 6 of them

Two more bugs for me to fix are the edit and delete for Type Editor. Sorry guys it my first time coding in PHP so I am a bit slow.
