[For The Original Post, Click here](#)

Hello everybody,

Because of IPB, Inc has been charging us the cost for using IPB 2.0 Final, our X-IPBM F200 will not be free on this site (bbpixel.com) and can not be downloaded (because I don't have permission to distribute them for use freely anymore).

Now, I am will make these Options to support everyone with the other purposes:

=====For Freely Users=====

1. IPBM 1.x will can be converted into IPB origin, with this option, you can transfer to the other board which you like.
2. IPBM 1.x for E-XOOPS/RunCMS is available
3. PHPBB 2.2x will be the next module that I intent to do.

=====For Business Users=====

1. We open Services for anyone who likes to use IPB 2.x versions: Integrate original IPB to XOOPS portal or Mambo portal, Converter DB between IPB IPB module.
2. Open Selling Service: Sell Modification Scripts... etc...
3. Open Service to make Modules for XOOPS/Mambo as your requests.

=====

These will make the new face for BBpixel, I think these changes will be a best way to make BBpixel existence while IPB, Inc is going to charge back us.

Trying to smile while we are wanting to cry on a bad day. _^|+_
