debaser 0.8 BETA released - Modules

NEWS_PDF_AUTHOR: Anonymous

NEWS_PDF_DATE: 2004/11/4 8:51:41

One step closer to perfection? 😃

Version 0.8 BETA has new features like:

- Permission system
- Plays any kind of multimedia
- New admin interface
- Assigning file types to players
- Categories with unlimited subcategories
- Use of getid3-class
and many more...

Unfortunately there are some flaws in design (especially personal player selection), so don't use on production sites!

I hope these flaws will vanish in version 0.9 which will have user playlists.
