ColorMatch Webdesign Tool - Modules

NEWS_PDF_AUTHOR: jmass

NEWS_PDF_DATE: 2004/11/10 19:34:31

I found a great tool on a fellow xoopsers site (Dream Catcher Designs). It allow for the selection of a base color and the automatic creation of complimentary colors based on that base color.

I have taken the script and created an installable module. There are some minor differences in the functionality.

You can see a live demo of the module at:

Quote:

Out of the Box Solutions, Inc.

Download is available through the downloads section of the above site under the category "Portal Modules".

Thank you,

Jason Massey
