A new website is born in the Wolf Pack Clan federation : [Star-Wars : ...all you need to know about Star Wars](#) !

The primary idea of this website was to create à mod space for Star Wars Battlefront. But for some reasons it turned to be a database place for all star wars fans out there...

In the mean time, I have used this site for some Xoops module advanced experiments : multiMenu, Edito, Edito's clones and more important the theme switching following the section you are visiting (just for this you have to visit it 😬).

Don't hesitate to visit the various parts, some themes have interesting and original items.

Please enjoy your visit in the Dark side of the WPC...
