

Code Data Management (CDM) V0.1beta released - Modules

NEWS_PDF_AUTHOR: chippyash

NEWS_PDF_DATE: 2004/11/15 20:16:35

As part of the long road to creating an Auction System for Xoops, the first module "Code Data management" (CDM) has been released and can be downloaded at [here](#).

What does it do?

CDM offers the following functionality;

- * Provides a central repository for all codes that may be used in one or more Xoops applications
- * Provides central management of code data utilising Xoops group authority mechanisms
- * Provides a program API based on xoopsObject that can easily be extended for additional application functionality

CDM is something for the application developer's toolkit rather than an end user app. Further info at [the author's website](#)
