download theme studioc_2005 and + howto doc of this theme - Themes

NEWS_PDF_AUTHOR: studioC

NEWS_PDF_DATE: 2004/11/23 18:41:10

I'm happy to announce the download of the actual theme from http://studiocreativ.de which should be an example theme for a small company site. It's a very simple and easy layout which uses only css for positioning things. The download contains of the themefolder and a docfolder in which you will find a 14 pages *.pdf document of howto and some sourcefiles described in the document.

Howto describes my way to go from static html file to xoops theme and the way to include css stuff. Perhaps someone can use this.

documents and theme are in first version, so please send comments and ideas to make things better on update or next.

grab your ZIP Version HERE! or TAR version HERE

have fun!
michael
