

## Installation Problem - News

NEWS\_PDF\_AUTHOR: onokazu

NEWS\_PDF\_DATE: 2002/1/4 20:34:30

The most of the problems we receive are due to database password checking in our install script and in our core main file. This seems to be a problem for those who do not set DB passwords on a local database server.

We are aware of this bug, and are working for a new install script. But we recommend a database password be set as a good habit even when you are installing on your local server. 😊
