McAfee and Sophos Virus Info - Modules

NEWS_PDF_AUTHOR: seventhseal

NEWS_PDF_DATE: 2004/12/8 17:15:51

XOOPS @ IBDeeming! has created a block/module add-on that allows you to display virus information from the repositories of McAfee and Sophos. Repositories are accessed through JavaScript and information is updated on a regular basis.

Make sure that you copy this package to a temporary location. Copy the module to your XOOPS site, and install through the administration panel. It's pretty straight forward! 😁

Check it out HERE!

Download your copy HERE!
