SmartFAQ 1.03 Final - Modules

NEWS_PDF_AUTHOR: marcan

NEWS_PDF_DATE: 2004/12/17 23:26:17

The SmartFactory is proud to release the final verson of SmartFAQ 1.03. You can download it here : SmartFAQ 1.03 Final The different language packs can be found here : SmartFAQ's Language Packs

Here are the changes from version 1.02 :

Quote:

> - When a user Requests a Q&A, the moderator can now answer this question and publish it aftwerwards. The question does not transit by the Open Question section.
> - When a new answer is submited for a Published Q&A, the moderator can now edit the answer before approving it, as well as merge the new answer with the original one and then edit this new answer.
> - The form to submit a new answer now displays the original answer of the Q&A.
> - When merging a new answer, the name of the poster is now inlcuded in the text as : 'Contribution by...'
> - When moderating questions or Q&A's, the name of the poster was changed for the name of the moderator. This has been fixed.

We would like to thank Carnuke for his excellent ideas and feedback 😃 Thank you also to Christian and Philou for their input.

If you find any bugs or have any feature request, feel free to submit them in the trackers of the project at the Developer's Forge.

Finally, if you have translated SmartFAQ in a language not yet available, we would appreciate if you could send it to us for inclusion in the SmartFAQ package. You can send language packs at faq@smartfactory.ca

Enjoy SmartFAQ !
