XOOPS-Plasma Theme - Ready to Go! - Themes

NEWS_PDF_AUTHOR: seventhseal

NEWS_PDF_DATE: 2004/12/18 2:10:00

XOOPS@IBDeeming is proud to announce the release of XOOPS-Plasma theme for XOOPS 2.0.7+. This theme is loosely based on a PHPNuke theme called Plasmatic. This theme has much less overhead than it's cousin - as most of the formatting is done through the CSS. There is also a little animation for the block headings! Check it out!

Included with this theme are blank buttons and blank headers so you can create your own site logo.

See it HERE!

Get your copy HERE!

Installation
Standard XOOPS installation - unpackage the zip into your XOOPS theme directory. Make sure you create your header using the file logohead_blank.gif. Save your edited version as logohead.png.

Thanks!
Thanks for using our mods, blocks and themes! Do you have custom requests? Don't forget to stop in, we are always looking for more things to fill our time! 😁
