I recently setup this site for a church in the area. They originally came to me for a Frontpage site(EEK!), which is interesting, since I don't sully OOPSoops, and a custom theme by the beautiful and mysterious Goran(<http://www.7dana.com>).

XOOPS nailed the account and Goran, as usual, nailed the theme **EXACTLY**. Just the right look and feel for a church site. Not too much, just enough. I will be using him again. He rocks. He makes me look good, too.

XOOPS makes it easy for everyone. Especially me. 😊
