

XOOPS 2.0.9 released - XOOPS

NEWS_PDF_AUTHOR: onokazu

NEWS_PDF_DATE: 2004/12/25 4:30:00

XOOPS Team is pleased to announce the release of XOOPS 2.0.9 final (not beta or RC). We have made a number of important fixes including patches for security bugs recently found in the newbb module. Therefore we encourage everyone to update to this version as soon as possible.

Full 2.0.9 package is available [here](#)

2.0.7.1-2.0.7.3 users, use the XOOPS 2.0.7.x to 2.0.9 patch to upgrade to the latest version. 2.0.7 users should use the XOOPS 2.0.7 to 2.0.9 patch. Sites running XOOPS older than 2.0.7 should first upgrade to 2.0.7 before applying the patch.

Patches are available [here](#)

Note to users using the newbb2.0 module

Do not upload the folders and files under /modules/newbb to your server. The files included in this package are not for the newbb 2.0. Please wait for the updated package to be released from the newbb2 project developers.

Changelog ===== - Security fix in the newbb module for PHP version html tag of subject is nothing (Mithrandir) - Fixed Bug #1035707 - Enable array type options in blocks (Mithrandir) - Fixed a typo in include/comment_form.php, patch #1041993 (Dave_I) - Fixed Bug #1044957 - xoopsmultimailer.php Username typo when SMTP-Auth (Mithrandir) - Fixed RFE #900348 - Sort user list alphabetically in System -> Groups. Also changed the way it fetches the users in the group so it fetches all of them with 2 queries instead of 1 + (1 per user in the group) (Mithrandir) - Added patch #1048384 - mysql_field_name and others, added (Mithrandir) - Fixed bug #1049017 - Blocks sharing a template are cached wrong (Mithrandir) - Added patch #1048382 - Module onUpdate function (Mithrandir) - Fixed bug #989462 - Handler object caching not working (Mithrandir) - Added RFE #900345 - View/Edit group membership in Admin -> System -> Edit User (Mithrandir) - Fixed Bug #1055901 - group.php(IN phrase is used ,query) (Mithrandir) - Fixed bug #1052403 - block update in module update (Mithrandir) - More fixes for register_globals off in the top 10 page of mylinks/mydownloads modules - Fixed a typo in modules/xoopsheadline/admin/index.php (Onokazu) - Fixed bug where 2 headline forms were using the same form name/id, causing JS error (Onokazu) - Fixed some html problems in mylinks/mydownloads admin page (Onokazu) - Secured mainfile.dist.php from disclosing paths (Mithrandir) - Fixed bug #1073029 (Onokazu) -

Fixed bug #1073532 (Onokazu) - Fixed bug #1080791 (Onokazu) - Fixed lang phrase
