

New Theme - blogstyle - Themes

NEWS\_PDF\_AUTHOR: Bassman

NEWS\_PDF\_DATE: 2004/12/29 9:17:18

I decided a while ago to try and create a theme that would be fast-loading, small in size, XHTML 1.0 HTML and CSS valid, and suitable for as many browsers as possible. The result looks a lot like what you might find used for a personal blog, so I called it blogstyle.

Features:

NO images whatsoever

Only 2 files - style.css and theme.html

W3C XHTML 1.0 HTML and CSS valid

11kb total file size (3kb zipped)

Fast load times - 3.92 sec for 56k connection.

View theme [here](#)

Download [here](#)

Will also be added to the Xoops Theme Library.
