UK based freeskating website called [UrbanSkaters](#) has taken me the best part of 3 months to build with Xoops. A few hacks here and there have made this probably one of the UK's best Inline / Quad Street Skating (freeskating) websites on the net.

If you're into Skating (not boarding) then check it out and drop me your feedback. I've packed it with everything a portal needs: Forums, chat room, photogallery, links, news, weather watch, calendar and much more.

It's pretty quiet right now, but that's because it's Winter over here. When the Summer arrives I'll start promoting on the skate scene more.
