

Members Homepages 1.01 - Modules

NEWS_PDF_AUTHOR: Wheeler

NEWS_PDF_DATE: 2005/1/13 19:15:33

Anticipated by many xoops webmasters, this is the first release of the long overdue Members Homepages module.

It allows the webmaster to provide the users of a website the ability to create and maintain their own personal homepage with their own content. It is based on the original obs_classroom module by Mithrandir.

Features:

- Admin can create multiple categories and sub-categories
- Admin can give group permissions to add/edit homepages in each category
- Users can create multiple pages
- Users can create multiple content blocks
- Users can show same content block across multiple pages
- Users can give other members permission to edit their homepages
- Plugin new content blocks for users to have added functionality on their homepages

Members Homepages Module
