

xf_pleasure (beta) - Themes

NEWS_PDF_AUTHOR: studioC

NEWS_PDF_DATE: 2005/1/16 14:09:16

hello all...

i played a bit with a full width theme. You are invited to download and test it for it's a beta. No changes in modultemplates until this time.

it uses only css for positioning things and is teached to be fast. Not all events have been tested in detail, eg. overflow of blocks with different content etc.

But sure you will use this for your own exercises if you are interested in playing with themes. so have fun.
