Yes feel free to have a look and make comments, do quick review.

Just wanted to get a message out for a site I've had for awhile which had no direction. So I remodelled said site over the past weekend. Still adding content plus have a css thing I'm dealing with otherwise it's alive and well. This site is almost entirely based on xhld, xmlne and a few Amazon links.

Ahhh... long winded.

Ok here is my new site with modified theme that has a blog kind of look and growing content. If you missed your chance at MacWorld, maybe I'll get lucky and someone who wants one, will buy a ipod shuffle or something. 🍷

Have fun  
Best Regards  
rocket98

p.s.  
I've used a Apple or Mac product going on 25 years.
