A site redesign of Snow-Skiing.com has lead to a much cleaner presentation of all the information on the site. The redesign was in preparation of great new things to come. Snow-skiing.com is lucky enough to be listed number one in the new beta MSN search engine for the term snow skiing. Hopefully with the use of Xoops we can build a thriving new community site for Snow-Skiing enthusiasts. Plans are in the works for a sister site in snow-riding.com as well.

XOOPS makes it easy to manage multiple content sites without having to remember which template is the "best last one" you where using.
