Though the site is up now for a few month, I want to introduce it here to you.

[The Fedora Community Portal](#) tries to be the community site for all issues regarding the [Fedora Project](#).

As an extension to the main xoops functionality, I quickhacked a mailing list interface, which syncs the forum and the mailing list. A proper integration in the newbb would be nice and if I have the time, I will try to submit a patch to the newbb project.
