w<http://www.AnimeNuke.com> and my site <http://www.SlopeAnime.com> are now using xoops. We are both very pleased with the XOOPS cms and hope that it will gain popularity in the anime community.

My site users are excited about the functionality xoops ads along their ability to comment and contribute in more ways.

After using xoops for only 2 weeks, over 1300 members have registered and the site is quickly gaining popularity.

Thank you to all the developers that put so much hard work into xoops and all of its modules.
