theme xf_commerce from xoopsfactory.de on it's way - Themes

NEWS_PDF_AUTHOR: studioC

NEWS_PDF_DATE: 2005/2/4 13:23:17

The next theme from xoopsfactory is on it's way to be released. Again, this theme does not use any tables for positioning things in theme file and is entirely build by using css. (Don't dare to say that it's teached to be fast this time but it IS if you will replace our images ...)
Dunno if there are so much resolutions of 800*600 alive and kicking but this theme will fit with its basic content area.

have a look at :

http://cms.foglio.de and tell me what you think about it. Perhaps tell me what you don't like so i can act before releasing it as download.

visit :

http://xoopsfactory.de

have fun
michael
