

WF-Sections 2.07 beta3 release - Modules

NEWS\_PDF\_AUTHOR: Bender

NEWS\_PDF\_DATE: 2005/2/23 8:44:06

WF-Projects Team just released beta3 of the WF-Sections 2.07 module. We announced the beta2 release about two weeks ago only on our website so i will include the changelog for beta 2 and 3 in this news submit.

Note: This is still a beta release and no update scripts are provided for older releases than 2.07 series.

=====  
22 February 2005 - Version 2.0.7 beta3  
=====

fixed: user submitted documents are saved as anonymous submissions  
bugfix for char encoding causing documents not to be stored in the database

=====  
06 February 2005 - Version 2.0.7 beta2  
=====

removed: broken link in category selection box  
fixed: php warning if xoops news modules is not installed fixed  
fixed: blank page with Viewarticles.php if gd library version 1.x fixed  
fixed: create document: Borked error message when creating a document without a title fixed  
fixed: forum link fixed (double backslash and lacking a subdirectory in the path)  
fixed: CSS Stylesheet not used in viewarticles.php  
fixed: Image tags (xoops-code) not working within documents  
fixed: Template topten.php does not include stylesheet  
fixed: Bug with spaw where if permitted to users group settings would be ignored  
added: Support for different editors using the upcoming xoops editor framework  
permissions: due to difficulties with the current permission system reverted back to module admins yes/no.  
fixed: Seperator lines not visible in firefox

[fixed: Tags \[title / subtitle\] only working in standard article display but not in print preview](#)

[fixed: Subsections taken 'offline' still visible and accessible](#)

[fixed: Author info block shows always email adress ignoring user settings for privacy](#)

[added: missing language define for forum selection](#)

[fixed: Xoops search shows results ignoring permissions](#)

[added: lang define for no permission of viewing this area](#)

[fixed: popular icons display incorrectly](#)

[fixed: related news items not showing when viewing an article](#)

[fixed: 'Links and select box' not working. Fixed a bug where the select box would have no content and could not be opened.](#)

[fixed: Check for Spaw makes document creation impossible if Spaw is not installed.](#)

[fixed: 'No WF-Sections Frame' would only show an empty page or if content was from a file just a link instead of content](#)

[fixed: 'Recent' block ignores configuration whether to show images or not](#)

[fixed: Submitted and Auto Published Documents have mixed descriptions](#)

[fixed: accessing articles by editing the url \(ignoring permissions\)](#)

[removed: reviews have been removed](#)

[fixed: Typo in language/english/admin.php](#)

[added: allow linking to phpbb2 forum](#)

[fixed: author name always displayed when viewing an article \(ignoring configuration\)](#)

[fixed: lots of php warnings](#)

[added: multiple editor Support based on "Xoops editor framework"](#)
