Xoops ODP v1.1 released - Modules

NEWS_PDF_AUTHOR: bihlink

NEWS_PDF_DATE: 2005/2/28 8:55:31

Since some people had problems with using first release of this module I added README file in new version with explanation how to stop geting 404 error messages or blank pages (on "some" servers). Hope that problem is solved now for everyone, just folow instructions in README file. New version is available for download HERE or you can see working demo HERE. For any other problems or bugs please visit our FORUM at http://www.EzyGuide.net and let me know.
