After an eternity (or so it seems) Bassman Themes is back up and running. I restored my site from a backup, so anyone who registered previously won't have to re-register, and all the forum posts are still there. I've learnt my lesson - no more free hosting! But more to come on that subject later.....

I'm working on 2 new themes, which can be previewed at www.bassmanthemes.com - tech2 and H1. All comments and suggestions welcome!
