Starting with no knowledge of XOOPS, only a desire to have a great content management system I purchased a 7Dana custom theme to get the site off the ground. After several months of working with XOOPS and 3 or 4 sites later, my Original Site [AdvenQuest Adventures](#) has been redesigned. The original 7Dana layout is still there, however the graphics and color scheme are all new. The new scheme attempts to capture the contrasts of the outdoor world.
