

Adminarea Revisited beta2 released - Hacks

NEWS\_PDF\_AUTHOR: ralf57

NEWS\_PDF\_DATE: 2005/3/23 13:17:53

Hi xoopsers,  
after a long delay the beta2 version of Adminarea Revisited hack is out.  
This hack aims to give a new and fresh look to the backend without editing the core files.

Besides many bugfixes (thanks to those who reported them) this release has 3 main features:

1)A brand new admin menu which is lightweight (only 5KB)  
and should be cross-browser and cross-platform

[See screenshot](#)

2)A new pluggable admin blocks system which allows you  
to display custom blocks in the admin area frontpage

[See screenshot](#)

3)A new scroller for displaying Xoops.org's news  
instead of the whole page like in the default installation

[See screenshot](#)

Other screenshots:

[Screenshot1](#)

[Screenshot2](#)

Since it is a hack i strongly recommend you to read the README file before installing.

[The Adminarea Revisited project](#) is hosted at dev.xoops.org

so go there for bugs reporting,forum discussions,files etc.

If you are not patient this link is for

[Direct download](#)

A final note: if you write your own adminblocks(plugin) please send them in so i can publically release them.

Nice xoopsing,  
ralf57.
