

Release: WF-Links 1.0 beta1 - Modules

NEWS\_PDF\_AUTHOR: Anonymous

NEWS\_PDF\_DATE: 2005/3/25 9:37:48

The WF-Projects Team are delighted to deliver another module to the Xoops Community.

WF-Links is a module for Xoops that offers more features than the original mylinks module which is part of the older Xoops distributions.

You can create a link section with multiple categories and sub-categories.

Here is a short selection of features offered:

- Create multiple categories and subcategories for your links
- Submission permissions per (sub-)category
- Moderation permissions per (sub-)Category
- Choose to validate link submissions first or have them automatically accepted
- Add screenshots to your links
- Add a description to your links
- Add a maturity rating for your links
- Allow user ratings and comments for your links
- Define publishing and expiration times for every link (optional)
- And many more...
