The original Wordbook modules by Hsalazar and improved by the german friends from http://www.myxoops.org is a complete dictionary module for Xoops, and now also and thanks to the improvement made by Mondarse, it counts with comments options and a public list of asked terms definitions, so any user would be able to suggest a definition for that term.

The module includes an new script in the admin section to import data from Dictionary v0.9x module, also programmed by Mondarse, and also some templates have been modified to show the number of comments for each term.

You can watch working it HERE
