did you ever hear of "Hommingberger Gepardenforelle"? No, you are right, it is just a combination of words which are used to have a seo contest. A german magazine called c't has published an article how to follow some search engine rules, ideas and methods.

With a new regged domain hommingberger-forelle.de i want to have a bit fun and see how my xoopsinstall will behave in this test and of course ... to learn a bit more about this topic.

comments are welcome and perhaps some of you want to help in pushing this site linking to it? use:

hommingberger-forelle.de

and feel free to submit your link into my linksection...

michael
