for those who are interested in topic SEO, here is a quick report what happens to my personal "Hommingbergerger Gepardenforelle". The domain <http://www.hommingberger-forelle.de> was regged last week and was optimized for keyword "Hommingberger Gepardenforelle". This is a little contest from a german magazine called c't. After 3 days google found that page worth to be mentioned on place 160 and today GOOGLE sorted his mind and put us at place 49 from nearly 1.110.000 hits of this keyword.

Other searchengines seemed to know that domain (they do show backlinks) but they do not find it worth mentioning our page under this keyword. Strange but ... to be honest ... they are right .. it is only a contest ... isnt't it?

Anyone willing to look at this page having tipps for me to optimize? Or anyone willing to give a backlink to my Hommingberger Gepardenforelle?

Please use:

[Hommingberger Gepardenforelle](#)

with this link and linktext and give me a note so that i can link back or submit your link with form of mylinks which is free without beeing registerd.

many thanks for comments and help.

michael
