Hi friends,
I would like to present a spanish site about music and musicians.

It's based on open source solutions, and the main sections are the following:
 - Music Portal based on Xoops
 - Musical Instruments Shop based on osCommerce
We were trying a module for XOOPS based on oscommerce, but the results we're not good, so finally we decided work with different systems.

We prefered an integrated system...anyway we're very happy with the project.

You can check it at http://www.rosimusic.com/ (my name is Rosi and I'm musician 🙂 🙂) and send me your comments.
