I would like to announce YAXS (times 3):

www.kxro.com

www.kdux.com

www.kix953.com (more of a step-child at this time)

These three radio station's websites have started a buzz in my parent company, and I hope soon to be able to use XOOPS for all of our 50-something radio station's web presence.

I have used XOOPS personally, or publicly for over three years now, and I am a solid fan of this community, and it's products.

Now to convert myself to contributor, and grab a coattail!
