

## Shoutbox 3.1 - Modules

NEWS\_PDF\_AUTHOR: Jan304

NEWS\_PDF\_DATE: 2005/5/14 7:59:26

Another new version of the Shoutbox 3.x serie. Not much changed, mainly bugfixes. If everything goes like planned, the next version should be able to store the shouts in a mysql table.

Till then you will have to deal with this version:

[Download Shoutbox 3.1](#)

### *Changelog:*

- \* Fixed: Possible warning in popup.
- \* Fixed: Wrong variable selection in popupframe
- \* Fixed: Forgot ":" after anonymous name...
  
- \* Changed: If you now deselect "guest" may post and block is visible to guests they will see the shouts but won't be able to add. This option gots now a logic!
- \* Changed: Almost all repeated actions are now packed in one class. This will speedy the conversion to a sql version.
  
- \* Added: You got now a maxview function. This is seperated from the trim function.
