Hi Xoopsers,

I can use some feedback on a project that is worked on by me.
The site is in Dutch, but will be ML in the near future.

I have used:

Xoops 2.0.10
WF-Channel
Protector
Spotlight
SmartClient and Partner
News 1.3
Xoops-Stats
Theme = lw_inclavert (small changes made)

I want to say thanks to Mithrandir and associates  (developers) for there hard work that is done.

When our project is official, I will make a donation to the community. (at this point my economic postion isn't ready for a donation) ;-D

The site: <http://www.versatech.nl> - A good idea for ICT.
