

Just a small wedding site - YAXS

I modified [Taka's](#) excellent *Organic bouquet* theme to make it a bit more complete, and the result is a [website dedicated to my upcoming wedding](#). It's just a small site, powered by XOOPS of course, using Marcan's [Multilang](#) hacks (works like a charm!), Catzwolf's [wf-channel](#) and theCat's [XF Guestbook](#).

I know it's not fully done yet (I still have to make it validate completely, and add some more content) but it's got enough body and info to share with you all 😊

Please leave a message, especially for my fiancée, who sometimes has to fight XOOPS for my attention and time 😊
