

YADXS: Yet Another Dutch Xoops site - YAXS

NEWS\_PDF\_AUTHOR: Watdehek

NEWS\_PDF\_DATE: 2005/6/15 7:47:02

Finally I have finished my business site in XOOPS.

Besides working for my boss, I started my own company which provides IT services for small businesses. I decided to use XOOPS for managing the site: [Flex Automatisering](#)

Modules used:

- WFChannel
- TinyContent
- Liaise

The theme is a modified Obscene theme from Astonthemes.

It still needs some textual changes but until now I'm very satisfied using Xoops for a business site.

And for the Dutch readers: Comments/Suggestions are welcome!
