XOOPS 2.2 was supposed to be released on June 30th (according to the Roadmap but unfortunately, you will have to wait another week for that.

We are close to announcing the CVS Nightly to be ready for beta testing, but it will not be until this weekend that we will make that announcement.

Releasing a major change such as 2.2 with only a few days of beta testing would not be a responsible thing to do so therefore I am officially postponing the release until Sunday July 10th.

I hope you will like the changes and feel that they are worth the wait.
