After trying a few different management systems for the art/music/animation project I have been co-working on, I discovered Xoops. Because of its versatility and ease of use; I was able to have an official website up in days. For those interested in animation, you can visit the project at <http://www.drackouniverse.com>

Thanks to Xoops I can continue to co-develop this production for a demo pitch in late 2006. Thank you so much for such an excellent product!
