Finally, my bengali(Indian)community site is now up and running with the help of XOOPS.

Announcing a new site that I did for my community using XOOPS. It was really the help of XOOPS powerful modules that help me make this sites within few days, I really want to thank the Xoops team and the creative and talented people who created those modules great work friends.. keep it up. I want to have a dating module in my site If someone can make a module on online dating that will be great, I do not have any php programming experience so I request php gurus to help me. Please visit my site:
