

MC Subscriptions - Modules

NEWS\_PDF\_AUTHOR: cuckston

NEWS\_PDF\_DATE: 2005/7/8 16:02:08

Hi all,

Firstly i would like to appologise for the time it has taken to release this module. I remember saying about a month ago that it would only take a few days but those few days ended up taking a few weeks and i thank you for being patient.

Secondly, the module is finally completed! Everything seems to be working and i think my programmer has ironed out the very large majority of bugs.

You can download the module at <http://www.nothrillshost.com/UK/xoops.htm>

You can view a demo of the module at <http://www.nothrillshost.com/subscription>

#### INSTALATION

Once you have installed the script you will need to make the module available to unregistered users. You do this by going to your admin page, then System Admin -> Groups -> Anonymous Users -> Modify. Then click on the MC Subscriptions access box.

There are going to be features added to this script which will include the ability to edit subscriptions and edit users. This will be available in the next upgrade.

I dont want to sound like a begger but this module will only be able to get constant upgrades through donations as i am not a programmer. I out-sourced a freelancer to do this project. You can donate towards the project through <http://www.nothrillshost.com/UK/xoops.htm>. I also welcome addons from other programmers within the xoops community. If anyone is able to add on to this script please let me know at [xoops@nothrillshost.com](mailto:xoops@nothrillshost.com).

Many thanks
