Friends,

Here is my deal site running on xoops latest, ported from phpnuke (old version of 6.x). Took some hard decisions to throw out the SEO url's for porting to xoops. But i am happy. Please leave your comments and suggestions on theme and look..

Still lot of other modules need to be ported, as of now its running with the base deals module.

Site URL : http://www.dealwithdeals.com/

Thanks
