

Cooking-Board.com - A Culinary Community - YAXS

NEWS_PDF_AUTHOR: gestroud

NEWS_PDF_DATE: 2005/7/16 9:20:47

[b]I'm pleased to announce the opening of Cooking-Board.com, a culinary community for international recipes and a growing archive of tips & tricks for everyone interested in the cooking craft.

Cooking-Board.com is based around sbruchet's excellent [Recette](#) module, and the eye-catching [Chitenay theme](#) created by [Latelier12](#).

The site also utilizes the [MyReviews](#) module for Cookbook review, as well as glossaire, myalbum, and a few other handy modules created by fellow XOOPSers.

A note to anyone who wishes to utilize the Recette module: This module cannot presently be used with XOOPS' news module installed on your site. If you're going to feature articles, I would suggest using [AMS](#), which has been pretty stable so far except for the problem with smart quotes and seeing a million `////` before every quotation mark. 😊
