PRLookup Tool - Modules

NEWS_PDF_AUTHOR: Anonymous

NEWS_PDF_DATE: 2005/7/16 15:32:17

The PRLookup tool is a simple script that queries Google to obtain the Page Rank of the given URL. The original script is courtesy of Google Community.com. I have ported the script over to work with XOOPS 2.0.x.

You can test and download the module at MyWebResource

TODO:
Add block support
Enable multiple domain queries

Best Regards,

JMorris
