Articles has now gone into "release candidate" status, so is now feature frozen.

This version, 1.0 rc1 (0.26 for internal use) has one extra feature over the last public release, which is pagination in the single category view. the amount of articles per "page" can be set in the prefs area.

I have only briefly tried the current version of Articles with XOOPS 2.2 rc2, and it appears to work, but I've not tried it properly so cannot guarantee it will 100%.

Anyway, I have decided that Articles as it stands will now only be maintained for bug fixes for XOOPS 2.0.x, and work on Articles version 2 will start for XOOPS 2.2.
