

Some XOOPS Documentation Available - News

NEWS_PDF_AUTHOR: carnuke

NEWS_PDF_DATE: 2005/7/31 10:32:47

Xoops.org recently recovered from a hackers attack to its server. Unfortunately the Documentation Site is still closed and documentation is still not available to the general user.

I have decided to host on My personal website some backup files that I had saved during the documentation editing process. This is only a small selection of the full documentation, but covers some of the essential reading and guides for Xoops CMS. We hope to restore the full documentation files as soon as possible.

Please visit [HouseofStrauss Tutorials](#) for available downloads of these files.

Xoops Anatomy Of A Default Theme

This document presented in MS word format, explains the structure and content of the xoops basic theme files.

Find out the requirements and guidelines for building your own xoops theme, using smarty, block positioning and essential code structure.

Xoops Beginners Tutorials pack is the complete pack of the following tutorials.

1- Blocks Basic.

A very simple explanation of how to Make a block visible and position it on your webpage.

2- Blocks Advanced.

Describes more comprehensive settings available through the Blocks Administration 'Edit' link.

3- Blocks Lost

Sometimes a block can get lost, if you deny it permission for all groups, this is how to find it.

4- Groups Permissions.

Shows you how to set permissions for groups to see a module and its blocks.

5- First website content

Demonstrates some basic admin. procedures such as simple configurations. Goes on to guide

you through making your first custom block with some simple formatting. Also how to set its position and permission for anonymous as well as registered users.

These files can be downloaded separately in this section. All files are flash presentations, which are idea for the beginner.

Xoops Beginners Tutorials (full pack)
